**Sewer Mainline & Lateral Inspection System**

This is the acceptance for the proposal and purchase of the Sewer Mainline & Lateral Inspection System from Best Equipment for \$262,709.00. The funds for the Sewer Mainline & Lateral Inspection System are part of the Regional Lift Station Bond (Ordinance 2019-19).

Proposal to Accept Table

Offeror	Total Amount	Delivery Time	Manufacturer
Best Equipment	\$ 262,709.00	3/2020	Envirosight

Purpose:

The purchase of the Sewer Mainline & Lateral Inspection System is a critical part of our inflow and infiltration (I&I) reduction program. I&I is groundwater and storm water entering the sanitary sewer system. This additional water into our sanitary sewer system takes up capacity in our collection system and treatment plant. By investing in this Sewer Mainline & Lateral Inspection System, our Wastewater Department personnel will be able to inspect our sewer mainlines & laterals to identify sources of ground and storm water entering our sanitary sewer system.
