Thoroughfare Plan Update

The purpose of the Whitestown Thoroughfare Plan update is to update the Thoroughfare Plan to reflect the layouts of the Mid-Point interchange with constructed development. Once updated, HWC will provide a layout for the best route of a connector road from the Midpoint interchange to Albert S. White. The Update will also include a town wide intersection analysis to ensure development is allocating proper right of way for intersection improvements. The Thoroughfare Plan update analysis will assist the town in incorporating these important roadway network improvements into the Metropolitan Planning Organization long term master plan, which will help with potential funding opportunities.
