

Water Department Fire Hydrant and Water Meter Training Memo

The Whitestown Utility Water Dept. would like to send two people to a factory training of Mueller Fire Hydrants and Neptune Water Meters. The vendor, Utility Supply, which represents Mueller Fire Hydrants and Neptune Water Meters, has offered to sponsor the training. The training trip leaves with other maintenance personnel from local municipalities on April 22nd to Tallassee and returns on the 24th. The training starts at the Mueller Fire Hydrant factory where the Mueller Fire Hydrants are manufactured. Participants will be factory trained by Mueller Factory Personal on fire hydrant maintenance, assembly, operation & conclude with a plant tour. The second day will be spent at the Neptune Factory where the water meters are manufactured. This training incudes water meter theory, assembly & maintenance, water meter testing & conclude with a factory tour. This is a valuable opportunity for our Water Department to get training at both factories with the fire hydrants and water meters used by Whitestown Utility for over 10 years.
