**RE: Trojan System UV3000Plus 2007 Replacement Parts**

To:  
Whitestown, IN

In the Engineered Submittal Package for the Trojan UV3000Plus 2007 systems, Trojan provided an equipment performance guarantee stating that the system will meet the required level of disinfection provided that the system is operated and maintained in accordance with recommendations made by Trojan Technologies.

In order for this equipment guarantee to be maintained, it is imperative that the appropriate components and replacement parts be used in the system. There are key replacement parts and system components that directly influence the performance and reliability of the system. Among these critical replacement parts are the UV lamps, electronic ballasts, printed circuitry etc. Without using lamps, ballasts, and other components that are approved and validated by Trojan Technologies, we cannot guarantee that the system will provide the required germicidal output. Subsequently, we cannot guarantee that the required dose is being delivered.

In order to keep the equipment performance guarantee intact, it is recommended that specialized system component(s) and service be purchased and contracted from Trojan Technologies. Trojan purchases only validated system components (lamps, ballast etc.,) from our suppliers and only those component(s) meeting our performance standards are passed on to the customer.

If you have any questions regarding this matter, or require any additional information please do not hesitate to contact us at (519) 852-2551 or send an email to: [midwestus@trojantechnologies.com](mailto:midwestus@trojantechnologies.com)

Best regards,
