Other benefits
While the site comprises 133 acres, only 83 acres are developable, with the rest being set aside for floodways and compensation areas. As a speculative, multi-building development, this project will be developed prior to an identified user. As such, while the number of new/additional jobs, and the associated salaries, all listed above, are good faith estimates based on past performance of this sector, they are not commitments by the applicant. Due to the change in land use, and the significant capital investment, even with an abatement this site will provide significant tax revenue to all taxing units far in excess of its current production. Additionally, much infrastructure work will be accomplished as part of the project, if a TIF bond can be secured to supplement the developer investment.

Whitestown Tax Abatement Application Supplemental Materials

10. On a separate page, briefly describe the nature of the business of your company.

The applicant is a real estate development entity with 20 years of experience undertaking industrial/commercial development. This development, once completely online, will add approx. 1.2 million square feet of developed office and logistics space to the Town of Whitestown, and constitute more than \$49 million of hard cost investment.

The developer is confident that the strength of the community will allow for full utilization of the facilities over time. The market has already demonstrated interest in the product as evidenced by leasing activity for previous projects undertaken by the developer. Expected uses of the buildings include logistics, distribution, warehouse manufacturing and office.

The requested tax abatement allows this project to support it achieving speed-to-market success, so opportunities that require fast access to facilities can be landed in Whitestown.

11. On a separate page, briefly describe the proposed real estate improvements to be constructed by your company at the project location.
