REALiTi SimScope™

AUSCULTATION TRAINING MODULE IN REALiTi 360

> HELP YOUR STUDENTS MASTER THEIR AUSCULTATION SKILLS WITH REALiTi SimScope™

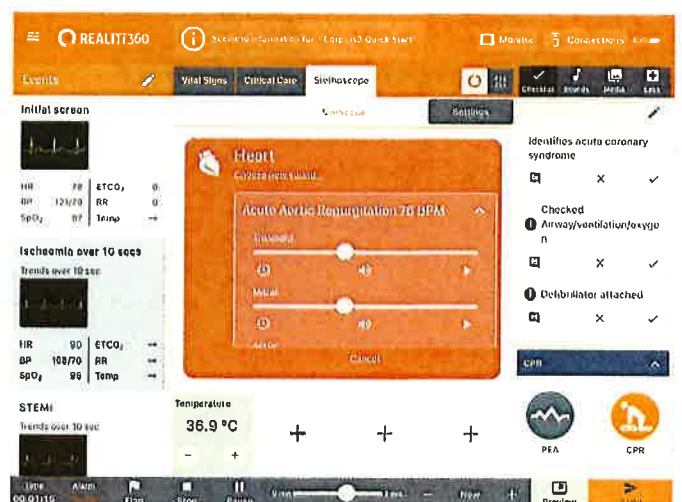

- + Learn how to distinguish between normal and abnormal respiratory and circulatory sounds and how to classify them correctly
- + Train for the diagnosis of normal and abnormal bowel sounds and their variations
- + Practice building a detailed picture of the patient to help in understanding the cause and extent of heart, lung, or bowel problems
- + Practice essential communication skills with patients and medical staff
- + Train for correct stethoscope placement

Included in the REALiTi SimScope™ Auscultation Module:

- REALiTi SimScope™ Auscultation Training Stethoscope
- Auscultation Software and License Key for REALiTi 360
- Standard adult sound library consisting of 22 heart, 11 lung and 3 bowel sounds powered by Cardionics
- Carrying case and USB cables
- User manual

The REALiTi SimScope™ Auscultation Training Module is accessed through the REALiTi 360 simulation ecosystem and provides users with the comprehensive sounds library by Cardionics. Sounds to the SimScope are initiated by the instructor when the trainee places the SimScope over the corresponding location.
